Free convection in an electrochemical system with nonlinear reaction kinetics. FRITZ H. BARK and FARID ALAVYOON *page* 1

A study of non-parallel and nonlinear effects on the localized receptivity of boundary layers. J. D. CROUCH and P R. SPALART 29

Sedimentation and sediment flow in settling tanks with inclined walls. B. KAPOOR and A. ACRIVOS 39

Wave-activity conservation laws and stability theorems for semi-geostrophic dynamics. Part 1. Pseudomomentum-based theory. PAUL J. KUSHNER and THEODORE G. SHEPHERD 67

Wave-activity conservation laws and stability theorems for semi-geostrophic dynamics. Part 2. Pseudoenergy-based theory. PAUL J. KUSHNER and THEODORE G. SHEPHERD 105

Strongly nonlinear interfacial dynamics in core–annular flows. V. KERCHMAN 131

On the equilibrium and stability of a row of point vortices. HASSAN AREF 167

Critical microjets in collapsing cavities. MICHAEL S. LONGUET-HIGGINS and HASAN OGUZ 183

Finite-amplitude three-dimensional instability of inviscid laminar boundary layers. MELVIN E. STERN 203

Non-axisymmetric instability of core–annular flow. HOWARD H. HU and NEELESH PATANKAR 213

An experimental study of a three-dimensional pressure-driven turbulent boundary layer. SEMİH M. ÖLÇMEN and ROGER L. SIMPSON 225

The dispersion of chemically active solutes in parallel flow. ANTON PURNAMA 263

The flow induced by the torsional oscillations of an elliptic cylinder. N. RILEY and M. F. WYBROW 279

On vortex air motions above an axisymmetric source of mass, momentum and heat. Y. A. BEREZIN and K. HUTTER 299

Influence of Prandtl number on instability mechanisms and transition in a differentially heated square cavity. R. J. A. JANSSEN and R. A. W. M. HENKES 319

Modulation of three resonating gravity–capillary waves by a long gravity wave. KARSTEN TRULSEN and CHIANG C. MEI 345

Theoretical aspects of gravity–capillary waves in non-rectangular channels. MARK D. GROVES 377

CORRIGENDA 405

REVIEW

Hydrodynamics of Suspensions, by M. Ungarish 406

INDEX TO VOLUME 290 409

SCHEDULE OF INTERNATIONAL CONFERENCES ON FLUID MECHANICS 410
